

PDF Sample Document

Sample Date:	October 2020
Prepared By:	Client Name
Created and Tested Using:	<ul style="list-style-type: none">• Framework 1.1• Additional Framework 2.1.0

Overview

This sample consists of a simple PDF document containing images, tables and bodies of text for use in future comparisons.

Each page features several different elements, which will be re-arranged and taken out of various versions to make appropriate comparisons. Below is an image:

The Comparison:

- The comparison process comprises several parts
 1. Identify the file type of each document and extract the contents to a string using the appropriate method
 2. Pre-process the string for each document to remove any line-breaks and unusual characters
 3. Compare the strings for a perfect match
 4. If no match, separate each string into a list of sentences to identify the differences
